

primary school furniture

The best start in life.

A well considered classroom installation for Early Years pupils can set the tone for the rest of their educational career. Ergonomics play a big factor in creating a conducive atmosphere for concentrated learning, especially as the physical size of children ranges considerably over the age groups.

Worktop heights are important and furniture for Reception classes, where low units are necessary can be purposefully manufactured. This can be incrementally increased throughout the year progression and even adjustment mechanisms can be incorporated—particularly useful in IT areas and to accommodate special needs pupils. All installations are robust and manufactured from materials which will resist moisture ingress. The capability to store large volumes of equipment and materials is equally important as classroom space is usually at a premium.

Special fitments, particularly play sinks, form part of the early learning experience. Food areas are equally important as they need to be tailored to the appropriate scale whilst still replicating a domestic setting.

The combination of well designed solutions finished in primary colours help to produce a stimulating work place in which children will enjoy the process of learning. **Network** are available to consult on the best ways of making use of the classroom

Image A – Teacher Fitment

- Optimised use of space for teaching aids
- Bold detailing and colours available to suit interior
- Flexible storage options to suit variety of items
- Made to measure cabinetry can use entire wall space
- Quick and easy installations minimising disruption

Image B – Computer Benching

- Surveyed and manufactured to fit all useable space
- Variety of worktop materials available for all budgets
- Robust under frame system ensures support integrity
- Cable management and outlets provided as required
- Accessories such as keyboard trays and tower cradles

Image C – Library Furniture

- Use of primary colours to create stimulating interior
- Variety of designs for storage of books and leaflets
- Welded under frame system to support high loadings
- Mobile units produced on heavy duty lockable wheels
- Scale and dimensions available to suit age groups

Image D – Typical Play Sink

- Use of primary colours to create stimulating interior
- Variety of designs for storage of books and leaflets
- Welded under frame system to support high loadings
- Mobile units produced on heavy duty lockable wheels
- Scale and dimensions available to suit age groups

Image E – Food Activity Areas

- Fitted kitchen scaled to suit age group users
- Range of cabinets and worktops available to suit
- Integrated appliances and sinks part of installation
- Other trades services available upon request
